

# COMPANY PROFILE

# OVERVIEW

Volt Assets Invest is a crypto mining platform to help you start earning crypto! It contains the most necessary tools for working with digital assets: cloud bitcoin mining, buying equipment with high hash power, crypto wallet, exchanger, and cryptocurrency portfolios. It is a meta-universe of crypto investments available to everyone.

Our company has been providing convenient, safe, and simple tools for crypto mining and investments since 2012. During this time, we have won the trust of thousands of users. So, join Volt Assets Invest, and start earning cryptocurrency today by using our bitcoin mining website.

Been in the business of asset mining and financial strategic management for years. It's all about maintaining focus on meeting and surpassing an individual or company's long-term business and financial goals, on creating and implementing processes for regularly reviewing and evaluating how your finances are doing, and on maximizing profitability and value.

## WHY CHOOSE US

### Leadership Integrity

Our lead with integrity, passion and honesty and in today's business world, that's a breath of fresh air.

### Referral Program

Invite your friends, co-workers or family and earn bonus upto 5% or more of their investment capital.

# OUR MISSION AND VISION

---

While our responsibilities and obligations in each of these three roles may differ, as we discuss below, our approach in all three is united by a common set of principles and ambitions, set out in the box at the bottom of the page.

We serve as an asset owner on behalf of Prudential With-Profits policyholders, and our pensions and annuity customers. This means we make decisions about how to allocate money to different asset classes and which asset manager should manage our money.

We also have the important responsibility of deciding the financial outcomes we want our asset managers to deliver for us, and the sustainability considerations we require them to apply.

For example, if we think that a certain industry does not have a sustainable future, we may require that the asset manager does not invest in that industry. Our responsibility as an asset owner is to create the best customer outcome in terms of general well-being in line with our fiduciary duty, taking into consideration financial security. We also invest as an asset manager on behalf of individual savers and asset owner clients. As at 31 December 2020, we manage over £233.4 billion for external clients and £133.8 billion on behalf of our internal client.

As an asset manager, we must aim to deliver the financial outcomes and any sustainability requirements set out in the objectives of each of our mutual funds, or in the mandates we receive from institutional clients. Sometimes there may be differences in the sustainability criteria that external clients mandate, and in turn these may differ from the requirements of our internal client. While our values of care and integrity inform all our sustainability work, the asset manager and asset owner are separately regulated businesses with independent Boards and governance processes, and their policies may diverge on occasion.

## OUR SUSTAINABILITY PRINCIPLES:

---

- We will consider sustainability and ESG factors when determining our corporate strategy and new business initiatives.
- We will embed sustainability considerations throughout our business.
- We aspire to be a thought leader, to innovate, and to advance understanding of sustainability issues.
- We believe in active asset ownership and management which encourages companies to transition towards a sustainable future.
- We consider the interests of all our stakeholders and ensure our views on sustainability are consistent with our longterm approach.
- We will manage our businesses to the same principles of acting responsibly that we hold our investee companies to account on.
- We review our sustainability thinking regularly in order to align with scientific and technological improvements, and changes in the global economy, ethics and consumer preferences.
- We aim to use our influence as a global investor and asset owner to drive positive change in sustainability policy and corporate standards.

# OUR SERVICES

## REAL ESTATE

For Investors with a more traditional and safe outlook or approach to investing, our active holdings in Real estate guarantee your investments are insured and that there is steady inflow of funds.

## INVESTMENT OFFER

We have up to 4 different investment contracts, investors are allowed to choose what works for them and have access to investment portfolios hand-picked by expert financial advisors and traders.

## GOLD MINING

Sometimes, a decline in one asset class might mean an increase in another, that is why our arms are also outstretched into the Gold mining sector as one of the lucrative and safe sectors this century.

## CRYPTO TRADING

Below the hype and speculation that have gripped this emerging asset class, there are market fundamentals. Our research aims to distill this information and separate signal from noise for all digital asset investors.

# Our Investment Plan

We offer the best plans around - from installations to repairs, maintenance, and more!
